

WEED POLICY

As Adopted by the Common Council 9-27-05

The Stoughton Street and Parks Department will be able to use chemicals for weed control under these conditions:

1. That they are used only on fence lines, next to buildings, along trails and inside ball diamonds as needed and within budget.
2. That they are not used anywhere near wells operated by Stoughton Utilities.
3. That the chemicals include broadleaf control (2-4-D), vegetation contact killers, and ground sterilant.
