

POLICY FOR SIDEWALK RAMP DETAILS

As Adopted by The Common Council 12-9-97

The City of Stoughton will require all new subdivision plat approvals to require installation of the 90 degree standard sidewalk ramps; ramps replaced by the City of Stoughton shall meet the 90 degree standard specifications in locations where vehicle traffic is equivalent to collector volumes and the single 45 degree standard where vehicle traffic is below collector volumes.

Additional Council Approved on 5/24/05:

Truncated domes are required to be used for accessible ramps, and shall be the MetaPanel product or a city-approved equivalent.
