### 2. Public Involvement and Participation

**a.** Describe how the municipality has kept the following local officials and municipal staff apprised of the municipal storm water discharge permit programs and its requirements.

Elected Officials

We maintain a City webpage that is devoted to stormwater management including our annual reports. The City utilizes an open form of communication at our public meetings that include stormwater topics at our Public Works Committee, Planning Commission and Common Council meetings. Public projects that include stormwater are discussed with our Public Works Committee and we communicate how the project affects our permit. The Planning Commission reviews development plans that include private stormwater management facilities where we communicate the rationale for the management technique and its compliance with our regulations and therefore, our permit. The Common Council approves our budget and as part of that process we discuss stormwater projects and activities. The Council also approves amendments to our stormwater ordinances when changes are made to further permit requirements.

### Municipal Officials

All City Leadership Team members get all agendas for meetings that include stormwater items. During our Leadership Team meetings we highlight stormwater projects and how they affect our permit. An open line of communication between the Leadership Team offers insight into stormwater activities even if they are not directly involved with stormwater activities.

### Appropriate Staff

Our Public Works crews in the field are conducting stormwater maintenance activities such as leaf pickup, street sweeping, swale mowing and maintenance, stormsewer inlet maintenance, etc. They understand these activities are related to the City's permit.

**b.** Complete the following information on Public Involvement Activities related to storm water. Select the mechanism that best describes how the topic message was conveyed to your population. In March 2017, we adopted updates to our ordinances related to construction site pollution control address deficiencies that were not meeting NR 151, NR 216 and our permit requirements. We issued 30 permits for new one & two -family homes in 2017. Our Building Inspector visits these sites multiple times throughout the construction (approximately 15 times each) allowing him to observe issues and work with the contractor onsite to have corrections made. Dane County provides inspection services for commercial sites.
